PHYSICIANS AND SURGEONS FOR INFANTS AND CHILDREN

FOR Clifford Watson Jr.

DATE 4-19-62

CHARGES, THIS VISIT:

P.C.
to
baby,

SUMMARY OF THE SITUATION:

17 # 202
^{10th %} 29^{1/2} ^{29th %}
 A bleeding tendency
 is obvious — type
 undetermined, but PGM
 history suggests Hem-
 philia C. — if so regular

TREATMENT INSTRUCTIONS

blood might suffice to
 help his blood coagulate.

- 1) Think of having
 blood tests done
 by hematologist at
 Children's.
- 2) Call me when you
 decide

3.) Protect him
from sharp objects
on which he might
fall or bang his
head.

4.) Bleeding that can't
be stopped by
compression, should
be brought to our
attention quickly.

5.) If "croupy", hold
over shoulder, in steam
& give Dimetane Expectant,
keep propped up well.
